Vocational Training
Centre Launched

BEERSHEBA Monday.— The cornerstone for the first of six vocational training centres to be constructed by the Government and T.C.A. was laid here today. Mrs. Golda Myerson, Minister of Labour, and Mr. V. Van Street, Legal Counsellor of the Mission, spoke.

The centre will be finished in a year's time and will be able to teach 100 trainees. The Ministry of Labour will invest T. 150,000 and T.C.A. will laarmark \$70,000 for squipment Tive other centres will be built in central towns in the country.

It is interesting to see that the seismograph accurately re-

Near East and a within the literature of Jerusalem.

It is interesting to see that the seismograph accurately reflects the vibrations caused by the inhab! Is of Jerusalem. No movement shown at night, but from 530 am, the graph shows a tremor increasing in intensity up to noon. From then on vibrations decrease until they cease completely by 1 am.

Dr. Press explains that in addition to the practical value of the seimographs for the recording of tremors, they will also benefit geological and climatological research. Measur-

Amendments to the Tax Law provide that the Finance Minister be authorised to transfer to the Local Authorities the task of collecting the tax on buildings and plots in the municipalities. If this step is taken, the value of the property will be considered for tax purposes as evaluated for the Armona Tax. The transfer to the Local Authorities, however, will be carried out after the Finance Minister consults with the Ministers of Justice, Healt and Labour, and a Government of Interior.

### TECHNION STUDIES MUST RESUME

A STATEMENT BY THE TECHNION STUDENTS

ASSOCIATION

Studies at the Bebrew Technion were suspended by the authorities as from Dec. 20, 1963. The Technion Authorities have put the biame for this action upon the students who — as they state — returned to pay higher free.

On the other hand, it has also been stated by the Technion Authorities that the curisting of the Government's grants is a decisive factor in its inhability to belance the budget. Nevertheless the impression is given that the refusal by the students to pay has caused the closing down of the Technion.

Studies were suspended in spite of the many appeals effected by the Knesset Education Committee and other institutions.

The student body will not acquiesce in this state of affairs and insistently demands the immediate reopening of the Technion. We hereby call the prompt attention of the Government, State Institutions and the general public to this serious situation and demand of them to express their opinion None of the abovementioned has the right to stand quietly saids while the only Institution for Righer Technical Education in the country is being closed.

Before publishing our own demands in detail, we—the student body—feet the necessity of making clear that the miss in the fees of H. 16.

tuition under threat of closing the Institution is likely to be regarded as something in the nature of a demonstration against the Government rather than a serious attempt to close the gap in the Institution's finances. After all the problem cannot be met in this way and it must be obvious that even a small rise in the cost-of-living index is in the cost-of-living index is likely to wipe out any gain which might be won by this very temporary measure.

It has to be borne in mind that there is a present the serious and he to be come in mind that there is a proper particle.

that there is some justifica-tion in the students' claim that a further rise of IL.50 this year on top of last year's rise of a similar amount is a major item in a struggling student's budget. It is per-fectly true that a comprehensive tuition fee of even IL.200 per annum is very little to demand by absolute and comparative standards for the very high quality of specialized very high quality of specialized and expensive professional training that the Technion gives. However a student's budget cannot be computed in Beersbeba to inspect Jean but his way. When students embark on the long course of training at the Technion they do at the museum there. Prehisteric archaeology is a special-bed at the museum there. Prehisteric archaeology is a special-bed at the Technion they do so on the basis of certain calculations carefully worked. bark on the long course of training at the Technion they do so on the basis of certain calculations carefully worked out by themselves and their families and in most cases such calculations leave very little margin. When one takes into account the steady rise in the cost-of-living, the difficulty students have in obtaining cheap and reasonable accommodation and the fact that rising unemployment in Haifa diminishes their opportunities of working their way through a Technion career, then it is obvious chat a rise of 100% within two years may in some cases mean the fine difference between a student's success and failure.

The blame in this dispute and crisis lies neither with the success and failure. The blame in this dispute and crisis lies neither with the success and failure. The blame in this dispute and crisis lies neither with the success in the fact in the finel analysis, must be solved graved into the largest sense, it lies firmly at the door of our poverty. Diginquality education such as we demand is expensive, and in the final analysis, must be solved as the first of the fi

open the Israel Institute of Technology.

This problem must be solved speedily, lest precious days of schooling are lost. There can achaoling are lost. There can adequate development and defence policy m a country which is inadequately equipped technically; and that is what many well happen unless the Technion is shie to develop and grow along with the country, and to serve it.

The question of the Technion's

was called to arrest the immigrant, and he was only released the following day. After three uveks of semi-starvation—without a food card but existing on donations made by neighbours—he was told that if he didn't agree to go to a border ssa'bers, he would be sent away forcibly. This man is a bicycle medianic and can earn his living provided he is settled in a populated area.

Y. Tel Aviv, October 18.

Zeiser, The Jerusalem Pest Sir.—As an Ulpan student who is very serious about learning Hebrew, I have a suggestion with regard to your Hebrew Column since it began, and have reached at the serious point in my Hebrew studies where I can pick up a few words in the morning they announce in the time at intervals of a few minutes. I am beginning to understand these announcements.

I suppose these news items are

LFORNITONE PICTURES D

HEBREW COLUMN

eer has only to read them. My suggestion is that someone with a good knowledge of English and Hebrew take notes for a few days and pick out 200 of the most generally used words. Many of the words are used over and over again since most of the news has to do with world politics. These 200 words could be printed together with the Hebrew Column in some Friday laue. People desiring to learn Hebrew could then study these words and would soon begin to recognize them in a broadcast.

I believe that there are many

Camp Director Replies
Reading Mr. Y.L.M.'s complaint,
one cannot fail to appreciate
the difficulties encountered by
the new immigrant in his initial
staps in this country. When the
newcomer leaves Sha'ar Allya,
consideration is given to his expressed wish to settle in a certain place. However, there are
other factors that enter into the
question of settling — such factors to a vacant house in the
desired ma'bare or the prospects of work in that area. The
list of allocation of places to
Sha'ar Aliya is epan to anyone
desiring to make his own choice;
advice is offered by the camp

Now on sale to readers and subscribers at all offices of THE JERUSALEM POST — Price 250 Pruin. For postal delivery, elip this coupon and MAIL NOW to THE SECURALEM POST, P.O.S. &I, Jerusalem.
